Experiences

COTEMIG	May 2024 - May 2025
Technical Teaching Assistant – Web/Mobile	Belo Horizonte, MG
Technical Monitor for the Web and Mobile Development course at Cotemig College. I was tasked with assisting in classes on:	
- Frameworks (JavaScript/React.js and Dart/Flutter) - Back-End Web Development (Node.js + TypeScript + Express.js + PHP) - Android Development with Android Studio + Gradle (Kotlin) - iOS Development with Xcode (Swift + SwiftUI)	
In this role, I developed skills in communication, analytical thinking, critical thinking, and problem-solving, among others.	
Second Mind	May 2025 - Present
Front-End Developer INTERNSHIP	Remote
I work on developing web and mobile solutions for the Physioclin healthcare management system, using technologies like Next.js (pages router), React.js , React Native with Expo , SCSS , MUI , and Context API . My contributions to the web project include implementing dynamic routes with URL enrichment, building complex forms with React Hook Form that integrate with various REST endpoints, developing reusable components, and defining precise typings with TypeScript . For the mobile project, I was responsible for creating dynamic components like FormStructure and ListPageStructure with support for real-time pagination and filters, refactoring authentication services, and consuming REST APIs with Axios . I styled components using Styled-Components and native StyleSheet , prioritizing usability. I am a member of an agile (SCRUM) team, where I actively participate in planning and feature delivery, which has helped me develop technical autonomy, logical reasoning, and the ability to solve real-world problems related to forms, APIs, and UI.	

Education

COTEMIG College	2024/12 - Present
Systems Analysis and Development	Belo Horizonte, MG
<i>Technologist (Ongoing – 4th Semester)</i>	
PUC Minas - Coração Eucarístico	2024/06
Software Engineering	Belo Horizonte, MG
<i>Bachelor's degree (Incomplete – 2nd Semester)</i>	
COTEMIG High School	2021 - 2023
Technical High School	Belo Horizonte, MG
<i>Technical High School in Web and Mobile Development (Completed)</i>	

Projects

CoverSpot	2024/12
 https://cover-spot.vercel.app/	
CoverSpot is a complete web application developed to connect cover bands with venues that hire live shows, streamlining proposal management, scheduling, and communication between parties. The platform offers a smooth experience for both musicians and business owners. - ReactJS, TailwindCSS, Axios, JavaScript, SQLite, NodeJS, Express, Sequelize, JWT, PostgreSQL. ReactJS, TailwindCSS, Axios, JavaScript, SQLite, NodeJS, Express, Sequelize, JWT, PostgreSQL.
